

Welcome to Import Communications

Radio dealer Wouxun.US is now ImportCommunications.com

TH-UV3R by TYT Dual Band Micro-size HT with fu

to Order

Wouxun.US is my domain name. It is not connected with Wouxun-China other than the fact I sell over 500 Wouxun radios per month. Wouxun-China does not like the fact that other brands of radios are associated with this web site so we are changing over to Import Communications. Any questions about products on this site should be directed to info@importcommunications.com only.

WOUXUN KG-UV6D

Products

Wouxun KG-UV6D

Wouxun

NOW AVAILABLE IN THREE VERSIONS

WE ARE THE ONLY US DEALER THAT SELLS THREE VERSIONS OF THIS RADIO

ALL VERSIONS FEATURE:

- 199 Memory Channels
- RPT Button*
- Lockable S/D Button**
- Tuning Knob functions when Keypad is locked
- IP55 (Dust and Water Jets rating)
- Uses all the same accessories as the other Wouxun dual band radios
- Uses the same antenna connector as other Wouxun models. (Not all 6D's are like this)
- In the box is: Radio, Dual-band Antenna, 1700 mAh Battery, Belt Clip, Stand-up Charger, Manual and fairly-useless wrist strap.

*When in Frequency Mode, the RPT button will quickly cycle through SIMPLEX, +OFFSET, -OFFSET, +REVERSE and -REVERSE to access repeaters. It can also be programmed for other functions.

** With the radio in "single display" mode, and with the Keypad, MENU and S/D buttons locked, the end user will only be able to turn the radio on/off, change channels and talk. This is perfect for the non-radio user. Nothing they do will get them lost in menu-land.

VERSIONS ARE DETERMINED BY FREQUENCY RANGE & TUNING STEP

Please note: Frequency Ranges below are CORRECT.

Other dealers may indicate different ranges, but these ranges are CORRECT.

KG-UV6D-2.5 (full range coverage for commercial users) **\$175.00**

- 2.5 kHz Tuning Step* - compliant with new FCC rules for Land Mobile Service
- 2.5 kHz Tuning Step available via Keypad and Software
- TX & RX - 136-174 & 420-520 (frequency range can not be changed by owner)

KG-UV6D-IC1 Ham Version (full range receive, ham band only transmit) **\$140.00**

- 5 kHz Tuning Step* from the keypad - the standard for Amateur Radio
- *Software will store frequencies requiring 2.5 kHz Tuning Step into Memory
- RX - 136-174 & 350-470
- TX - 144-148 & 420-450 (frequency range can not be changed by owner)

KG-UV6D-IC1 Public Service Version (full range transmit and receive for ham, MARS, public service) **\$150.00**

- 5 KHz Tuning Step* from the keypad - the standard for Amateur Radio
- *Software will store frequencies requiring 2.5 kHz Tuning Step into Memory
- TX & RX - 136-174 & 420-520 (frequency range can not be changed by owner)

-----or-----

TX & RX - 136-174 & 350-470 (frequency range can not be changed by owner)
