History

#1 - 11/13/2013 05:07 pm - Barry Evans

Equipment load is offered by me for vetted developer.

#2 - 11/14/2013 07:58 pm - Barry Evans

- File Prolific USB-to-Serial Comm Port (COM6)\$131014\$1.dmslog7 added
- File RawExportOnWrite.file added

I have a serial port monitor trial installed. First stab at using Yahoo group software and port monitor on both a read and write attached. Please advise if these are any help or what tests/data I can grab before this trial-ware expires.

#3 - 05/15/2020 10:26 pm - Bernhard Hailer

- Status changed from New to Feedback
- Target version set to chirp-daily
- Chirp Version changed from 0.3.0 to daily
- Equipment Loan Offered changed from No to Yes

Sorry, "slightly" late feedback...

The Wiki has instructions how to get this kind of data; However, it's much easier for the developer to have the radio physically available.
