Chirp Version:	daily		
Equipment Loan Offered:	No		
Subject:	Bao-hui or Baohui BH-620		
Description	<p>I'd like to welcome everybody, first time in chirp.</p> <p>I have a problem- I've bought "Professional FM Transceiver" called Baohui BH-620, UHF 403-470mHz, voltage 3,7 v and I really can not discover default frequencies or to connect it by CHIRP to PC.</p> <p>This is a simple transceiver with 15+1 channels, no screen.</p> <p>Is it similiar to some existing and more popular model? What can I do to connect it to CHIRP??</p> <p>How can I find default frequencies in it.</p> <p>HELP!</p> <p>Dobrosław</p>

Try Baofeng BF-888 from the list.

If that does not work, can you provide some internet link to a picture, site with details about this radio, and/or FCC ID.

I cannot find anything on a simple search for "Baohui BH-620" or similar.

Thanks for your interest, Jens.

I've tried BF-888 because it seemed the most similiar but it doesnt work.

I'm a little experienced, I have Baofeng uv82 and I can connect and operate it by usb with any trouble.

I'm afraid they doesn't have FCC ID, the company doesn't have www either.

But ther's a photo and details:

<http://allegro.pl/krotkofalowki-zestaw-2-szt-zasieg-10-km-hit-i3946189470.html>

Serial number: S/N: TX2510121025620570, BATTERY: S/N:TX2510121025620129

The price is good but service...

If u're so kind, look at this.

Sincerely

Dobrosław

When you say BF-888 doesnt work, what do you mean?

Can you attach a debug.log from a session where you attempt to download?

Can you provide the programming software or a link to it?

Without the programming software, one could only get lucky if it was an exact clone of another common model (which it probably is, but I'm not an expert on this class of radio).

I use CHIRP, and with BF-888 there's:

Radio returned unknown identification string.

e.g. for F-11 it's:

Radio did not respond.

I have the same brand but it's called Baohui BH-918 and can be programmed by the keypad. Will check if i can program it by chirp.

- *Status changed from New to Feedback*
- *Priority changed from Urgent to Normal*
- *Target version set to chirp-daily*
- *Chirp Version changed from 0.3.0 to daily*

Have you been able to resolve this on your own since you submitted this?

Have you tried with a recent version?

If you haven't, and if you're still having this issue, please refer to the Wiki [\[\[How To Report Issues\]\]](#) and provide a debug log. Thanks!
