

CHIRP - Feature # 1681

Status:	New	Priority:	Normal
Author:	Dan Drogichen	Category:	
Created:	06/05/2014	Assignee:	Dan Drogichen
Updated:	12/30/2015	Due date:	
Chirp Version:	0.4.0		
Model affected:	(All models)		
Subject:	[developer] Control fontsize of hex diff/dump display		
Description			
<p>Chirp currently contains a hex diff/dump feature for comparing image files. This is invoked by selecting View -> Developer -> Diff tabs, and in the "Diff Radios" popup, selecting -1 for either or both of the memory locations.</p> <p>The fontsize of the resulting diff/dump display is fixed at 11. This is not an optimum size for all users.</p> <p>This change introduces user specification of the font size to use for this display, without affecting any other Chirp displays. This is done with a new chirp.config integer property diff_fontsize in a new [developer] section. The default is unchanged at 11.</p>

[developer] Control fontsize of hex diff/dump display - #1681

Add user specification of the font size to use for the hex diff/dump display, without affecting any other Chirp displays.

This is done with a new chirp.config integer property **diff_fontsize** in a new [developer] section. The default is unchanged at 11.

Values between 4 and 144 are accepted; others result in the default.

Add a new file README.developers at the top level of the repository to document chirp.config [developer] section properties.

#1681

History

#1 - 06/07/2014 09:38 am - Dan Drogichen

In addition to the functional change, add a new file README.developers at the top level of the repository to document chirp.config **[developer]** section properties.

#2 - 12/30/2015 12:04 pm - Tyler Tidman

It would appear that this issue is marked as 100% complete. Does this mean the issue should be marked Closed?
