Steve,

Would you care to supply some information? CHIRP supports many different brands and models of radios with a wide variety of features. Otherwise we would have to guess which one you are having a problem with.

Would you also supply a .img file saved from CHIRP while this problem is present and explain exactly what the problem is?

#2 - 07/05/2014 06:16 pm - Jim Unroe

Steve,

OK. Now I see. You are talking about the "Open stock config" -> "US 60 meter channels(Dial)". Thanks for point this out.

I presume that 3.346500 should be 5.346500, right?
