

CHIRP - Bug # 1891

Status:	New	Priority:	Normal
Author:	Rick Highness	Category:	
Created:	09/03/2014	Assignee:	
Updated:	02/18/2016	Due date:	
Chirp Version:	0.4.0		
Model affected:	(All models)		
Platform:	Linux		
Subject:	Unable to copy/paste memories on FT-8800R		
Description	<p>Have an FT-8800R and wanted to duplicate the left side memories on the right side. Can do a CTRL-A and select all and then attempt a copy (either by pull down menu or by right clicking and selecting copy).</p> <p>But when I attempt to paste - (either by pull down menu or by right clicking and selecting paste), no paste. No joy.</p>

I think this is a regression from #739.

It seems to only affect copying from one side of a radio to the other. It does not affect copying to and from other models of radio, or copying within one side of a radio.

A temporary workaround would be to paste everything into a CSV (Ctrl-N) or other radio, then copy the CSV, then paste back into the other side of the radio.

Just wondering if any progress has been made on this? Thanks!

#3 - 02/18/2016 09:45 pm - Jon Blackwell

Another work around I found:

I was building a file for my friend with a FT-8800 and could not copy from one side to the other. I had done so previously as I also have a FT-8800. I saved his file with only one side containing any repeater info. I then opened up his file so that both tabs contained the same file. I could then copy from the right side of one file to the left side on the other file. Re-save and you have a complete left and right file.
