CHIRP - Bug # 1917

Status:	Closed	**Priority:**	Normal
Author:	Bertrik Sikken	**Category:**	
Created:	09/20/2014	**Assignee:**	Jim Unroe
Updated:	09/22/2014	**Due date:**	
Chirp Version:	daily		
Model affected:	UV-B5		
Platform:	All		
Subject:	[UV-B5] Settings 'STE' and 'beep prompt' invert when changing setting 'save mode'		

Description

When I change the setting 'save mode', two other settings ('STE' and 'beep prompt') change too.
In the code I see those two settings are a bit special, in hardware you have to set a bit to **disable** them.
There seems to be logic present already to handle this, but the mechanism does not fully work apparently.
To reproduce:

- Disable 'STE' and 'beep prompt' manually on the radio. Enable 'save mode' manually on the radio.
- Download from the radio in chirp
- Change setting 'save mode' from off to on.
- Upload to the radio in chirp
- Download from the radio in chirp again
- Observe that the settings 'STE' and 'beep prompt' are now enabled.
- Observe that the 'beep prompt' icon on the radio display is showing.
