

CHIRP - Bug # 1971

Status:	Rejected	Priority:	Normal
Author:	Wenlock Burton	Category:	
Created:	10/16/2014	Assignee:	
Updated:	11/11/2014	Due date:	
Chirp Version:	0.4.0		
Model affected:	ID92AD		
Platform:	Windows		
Subject:	Error downloading from IC92AD		
Description			
<p>Just installed the latest stable version only to find when I try to download from the radio the fields contain Error and no data has been downloaded from the radio.</p> <p>I have verified that the cable is working and the radio is communicating with the Icom RS-92 software ok.</p> <p>I have verified that chirp is configured for Icom IC92AD and Com 6, the com port number is verified with Device Manager and the Icom software.</p> <p>I can't attach the debug log as it exceeds 5MB, I have pasted the following which is repeated many, many times:</p> <pre>Exception running RadioJob: 'NoneType' object is not subscriptable -- Exception: -- Traceback (most recent call last): File "chirpui\common.pyo", line 111, in _execute File "chirp\ic9x_icf.pyo", line 63, in get_memory File "chirp\ic9x_icf_ll.pyo", line 123, in get_memory File "chirp\ic9x_icf_ll.pyo", line 47, in get_raw_memory TypeError: 'NoneType' object is not subscriptable ----- Job Args: (800,) Job KWArgs: {} Job Called from: File "chirpw", line 154, in <module> File "chirpui\mainapp.pyo", line 428, in cb_clonein File "chirpui\mainapp.pyo", line 362, in do_open_live File "chirpui\editorset.pyo", line 137, in init File "chirpui\editorset.pyo", line 73, in _make_device_editors File "chirpui\memedit.pyo", line 1344, in init</pre>
