<b>Subject:</b>	Find duplicate channels function suggestion		
<b>Description</b>	<p>I have realized i have a few duplicate entry channels programmed into my radio. And i would like to clean up my storage on my device, however at this given time there is no option to find duplicate channels. I think it should be fairly simple to create and an extremely useful function. Please take my suggestion into consideration. Doesnt hurt for great software to become better.</p>

- Target version changed from 0.4.1 to chirp-daily
- Chirp Version changed from 0.4.0 to daily

Actually, there are good reasons to have duplicate channels programmed (e.g. if you are using memory banks and group channels by certain properties).

Technically, you could export your channels as CSV and sort / check using a spreadsheet program such as Microsoft Excel.
