<b>Model affected:</b>	(All models)		
<b>Subject:</b>	Import State agencies through Radio Reference		
<b>Description</b>	<p>I was trying to figure out how to import State agencies (GA DNR and GA Forestry ), that have district and state wide frequencies, through the radio reference web service download option. Radio Reference informed me that it would be a program related issue, So i am assuming it is possible. Currently there is no way import these frequencies unless you do it manually. I tried some zip codes where the towers or agency's are, with no luck. If there is a current work around that would work, that would be great. Let me know if there is anything I can do to help. Thanks for all your work.</p>		

### History

I think the RR interface that allows for downloading statewide data did not exist when this feature was first added to Chirp, so this is a valid request for new functionality. I'll dig into it as some point, but it's pretty low on my to-do list so don't hold your breath. Sorry about that.
