<b>Description</b>			
<p>I have just started to use Chirp with my Yaesu FT1D, and as was gathering the packages on the download page I noticed the DONATE button. Try as I might with both Safari and Firefox, I am unable to get that link to work. Safari fails completely. Firefox briefly displays a link to PayPal and then that's it. I'm trying to donate money to the cause. Even getting here to post my trouble was daunting to say the least so I apologize if I am reporting this problem in the wrong way or the wrong place.</p>

When I click the donate button from latest Chrome, Safari, or Firefox, it brings me to a page on paypal.com where I can enter the amount I want to donate. The only thing I can think of that might prevent this working for you is some sort of ad blocker or virus hijacking your requests to Paypal. Can you try on another computer and/or network?

And yes, this isn't really the right place to troubleshoot issues with the website, but I'll roll with it.
