

## CHIRP - Bug # 2697

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	Peter Sheerin	<b>Category:</b>	
<b>Created:</b>	07/05/2015	<b>Assignee:</b>	Tyler Tidman
<b>Updated:</b>	03/01/2018	<b>Due date:</b>	
<b>Chirp Version:</b>	0.4.0		
<b>Model affected:</b>	(All models)		
<b>Platform:</b>	All		
<b>Subject:</b>	Weather Alert frequencies are labeled wrong		
<b>Description</b>			
The channel names in your NOAA Weather Alert stock config are not entirely accurate.			
Please see <a href="https://en.wikipedia.org/wiki/Weather_radio#Governmental_weather_radio_services">https://en.wikipedia.org/wiki/Weather_radio#Governmental_weather_radio_services</a>			
I'd like to submit the attached file as a suggested replacement, which includes the long-time understood "WX1 to WX7" names, and the newer "Public Alert" names, based on the above Wikipedia article and its cited sources.			

### Associated revisions

Revision 2648:1e9a5c83b65f - 02/08/2016 09:55 pm - Tyler Tidman

Update WX channel stock config. Fixes #2697.

### History

#1 - 07/05/2015 02:59 pm - Jim Unroe

- Status changed from New to Feedback

Peter,

The stock config files are in CSV format. You might want to resubmit what you have in that format.

Also, the "/" may not be a valid character for all radios. Someone else might know better if this will be an issue or not.

Jim KC9HI

#2 - 07/05/2015 05:33 pm - Peter Sheerin

- File Improved Weather Alert.csv added

Jim,

Thanks for the tips. I suspect you may be right about the / character, but I don't know for sure.

**#8 - 10/25/2016 11:21 am - Tyler Tidman**

- Status changed from *Resolved* to *Closed*

Merged. Closing.

**#9 - 02/10/2018 09:21 am - Peter Sheerin**

- File *2018 NOAA Weather Alert.csv* added

I goofed in the sample file I uploaded, and the new file is thus still wrong.

The reference I cited was correct, but I mistyped the sample files.

I've attached a corrected CSV file, but can someone please double-check my typing in the new file against the Wikipedia reference, to make sure I haven't transposed anything this time?

I fail to see the error. Unless I'm mistaken, the csv file that as committed is in the correct format and has the correct frequencies assigned to the correct WXn channel.

I was sure there was a problem when I filed the update, but I don't see it now, either. I double-checked the original attachments and the latest nightly, and still don't. Buggers.

I don't know if I was simply confused by the WX vs PA number differences, or if I noticed something in the transfer to my radio I can't now duplicate. :-( Doubly embarrassed but glad I didn't seem to make any mistakes in my original filing. DE K6WEB
