

CHIRP - Bug # 2791

Status:	New	Priority:	Normal
Author:	Daniel Hines	Category:	
Created:	08/12/2015	Assignee:	
Updated:	08/13/2015	Due date:	
Chirp Version:	daily		
Model affected:	(All models)		
Platform:	Windows		
Subject:	Chirp won't open on my Mac G5.		
Description	<p>I have an older Mac and want to run Chirp on it. My OS is 10.5.8. When I click on the icon, it tries to open but that's all. I see it expand and disappear. Anything I can do to run this?</p> <p>Thank you.</p>

Daniel,

Have you installed the KK7DS Python runtime? See the Install Notes for Mac OS X near the bottom of the Download page.

Daniel,

I'm not a Mac person so I don't know the Mac models. When you say the G5 is old, is it a PowerPC? According to Install Note 4, the PowerPC is not supported.

After looking closer at the properties of this computer, I did find that it is a PowerPC. I'm not a Mac person and wasn't sure what I had. Thank you for responding.
