| <b>Subject:</b>  | UV 5R + program issue |                  |        |
| <b>Description</b>   |                       |                  |        |
| <p>I just made the mistake of starting up chirp and did not download a file from the radio first. I just uploaded a file I had for use with my older UV5R.....my radio does not receive anymore.....shows the correct frequencies I programmed but screwed the radio up....not matching firmware.</p> <p>Is there any way to correct my carelessness ?</p> |                       |                  |        |

### History

#### #1 - 12/11/2015 08:05 pm - Jim Unroe

Doesn't sound like you were using a recent daily build of CHIRP. A recent daily build would have prevented you from doing this. Give this [Recovery using CHIRP Software](#) method a try. If that doesn't work, then email me direct and I will help you get it going again.
