CHIRP - Bug # 3421

Status:	Closed	**Priority:**	Normal
Author:	Stephen Schofield	**Category:**	
Created:	03/05/2016	**Assignee:**	Stephen Schofield
Updated:	03/05/2016	**Due date:**	
Chirp Version:	0.4.0		
Model affected:	UV82C		
Platform:	Windows		
Subject:	UV-82C		

Description
I have used chirp before to program my radio, everything is working great except for the settings mode in the chirp software. It will load all of the channels from my UV-82C but, it wont load any settings to where i can change them, i dont really understand why because i have adjusted the settings before a while back, but now cant access them.

Are you using the latest daily build? If not, upgrade (the latest is CHIRP daily-20160301). Then download from your radio. There will be a "Settings" tab on the left.

it looks like I am. I attached a document with screen shots. I may just be missing something.

For some reason your radio has a setting that is out-of-range so CHIRP is confused and won't display the settings. Attach your *.img file here or email it to me so I can take a look at it.

Are you looking for my radio configuration or the screenshots i took? If you are looking for the screen shots they are attached under the name doc1, i wasnt able to save them as an image file

- File Stephen Radio Settings(fixed).img added

Stephen,

The byte that sets the squelch threshold for one of the UHF squelch levels was out of range. I changed it to a value that is consistent with a "normal" factory image.
