

## CHIRP - Bug # 4417

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	Kirk Alsup	<b>Category:</b>	
<b>Created:</b>	01/16/2017	<b>Assignee:</b>	
<b>Updated:</b>	12/17/2019	<b>Due date:</b>	
<b>Chirp Version:</b>	daily		
<b>Model affected:</b>	BF-F9V2+		
<b>Platform:</b>	All		
<b>Subject:</b>	BaoFeng BF-F9V2+		
<b>Description</b>			
<p>When using CHIRP the Model is not available. I read somewhere to use the BF-F8HP and it should work. Whenever I do that I get an incorrect model selected. This is a brand new radio, never programmed and I am also new to radio's.</p> <p>I downloaded the Chirp daily installer for 15-Jan-2017. I am on a Windows 10 PC and have installed the drivers for the USB cable as well.</p>

Unfortunately Baofeng has been shipping radios that have 3 power levels that use the BF-F8HP model selection with a firmware version that identifies the radio to CHIRP as being a radio with 2 power levels. Download using the UV-5R model selection. If that works then look at the firmware version (Settings -> Other Settings -> Firmware Message 1:) and if it is HN5RV01{something}, then that is the problem. If that is what it is, I don't know of a simple solution at this time.

Jim,

Thanks for the information. It looks like the UV-5R worked on the download. I will update my lists and do an upload to the radio and see if that works as well.
