

CHIRP - Bug # 4647

Status:	Closed	Priority:	Normal
Author:	David Pechey	Category:	
Created:	03/19/2017	Assignee:	
Updated:	02/06/2020	Due date:	
Chirp Version:	daily		
Model affected:	Baofeng UV-5RV2+		
Platform:	Windows		
Subject:	Radio not talking to Chirp		
Description			
<p>Windows tells me that my device is working properly but then I go and run Chirp all the way to the Download from Radio, it tells me "An error has occurred, Radio did not respond"</p> <p>What is causing this to happen? I got it done about two days ago, today I decided to add more frequencies and that's when I got the error.</p> <p>Most recent daily build. Use the prolific driver version 3.2.0.0. Windows 7 64 bit OS.</p> <p>Baofeng UV-5RV2+ Firmwarm version BFB297</p> <p>Thanks, Dave</p>

- Status changed from New to Feedback

Include your debug.log file. My guess is that your radio is not reporting its firmware version during the cloning process. This seems to be common now.
