CHIRP - Bug # 4701

Status:	Closed	**Priority:**	Normal
Author:	Stan Coffield	**Category:**	
Created:	04/04/2017	**Assignee:**	
Updated:	02/26/2020	**Due date:**	
Chirp Version:	daily		
Model affected:	Baofeng GT-5TP		
Platform:	Windows		
Subject:	Baofeng GT-5TP not recognized		

Description

Hi,
I bought a pair of Baofeng GT-5TP radios on fleabay
Both radios were recognized by chirp, downloaded configured and uploaded using the UV-82HP config.
One arrived with transmit audio issues, vendor replaced the radio body
New radio will not download to Chirp, tried UV-82HP and BF-F*HP no joy. Chirp returns a model not recognized issue
I have attached the debug log.
This looks wrong: [2017-04-04 12:38:47,750] chirp.drivers.uv5r - INFO: Radio Version is '\xff\xff\xff\xff\xff\xff\xff\xff\xff\xff\xff\xff\xff\xff\xff\xff'
TYVM,
73
Stan

- Status changed from New to Feedback

It is wrong. Your radio is not reporting its firmware version to CHIRP. Many Baofeng radio models have recently began shipping this way.

This unfortunate change has been reported multiple times. I recommend that you follow this issue where it is currently being addressed. You could also try the test driver that is available there (but I don't remember if it addresses the the addition of the UV-82 variants like you have - it initially started out as being limited to UV-5R variants). Also a patch has been submitted to work around this issue (and it does address the UV-82 variants like the GT-5TP).

Jim

#2 - 02/26/2020 05:02 pm - Bernhard Hailer

- Status changed from Feedback to Closed
- Target version set to chirp-daily
- Chirp Version changed from 0.4.0 to daily

Duplicates #6403, which has attracted further input. Please leave any feedback there. Thanks!
