

CHIRP - Bug # 5075

| | | | |
|--|----------------------------|------------------|----------------|
| Status: | Closed | Priority: | Normal |
| Author: | Patrik Nilsson | Category: | |
| Created: | 08/16/2017 | Assignee: | Patrik Nilsson |
| Updated: | 03/02/2020 | Due date: | 08/23/2017 |
| Chirp Version: | daily | | |
| Model affected: | (All models) | | |
| Platform: | Linux | | |
| Subject: | Desktop Entry File (Linux) | | |
| Description | | | |
| <p>The targeted desktop entry specification version is 0.1 , while all modern desktop applications use 1.0+.</p> <p>You can find the latest version of the specification here:</p> <p>https://standards.freedesktop.org/desktop-entry-spec/desktop-entry-spec-latest.html</p> <p>Based on what I can find I am unsure if version 0.1 has ever existed; maybe a typo? Anyhow there are several issues with the file that I intend to fix (or have already fixed rather).</p> <p>Issues:</p> <ul style="list-style-type: none">- Update "Version" to 1.0- "GenericName" key should not mention CHIRP, which is not generic- "Comment" key "should not be redundant with the values of Name and GenericName" and format being incorrect: "Radio Programming Tool" instead of "Program amateur radios"- Fix hard-coded icon name extension (Breaks icon themes among other things)- Fix "Categories" using incorrect non-existing main category "Application"- Add ability to open files with chirpw- Add several "Keywords" | | | |

Fix Linux/Unix desktop entry file Fixes #5075 #3491

- Update "Version" to 1.0
- Fix "GenericName" not being generic
- Fix "Comment" being redundant with "GenericName" and wrong format
- Fix hard-coded icon extension
- Fix "Categories" using incorrect non-existing main category "Application", using "Utility" instead.
- Add ability to open files with chirpw (based on Debian patch)
- Add several "Keywords" for discoverability

Fixing the hard-coded icon enables theming and is a pre-requisite for adding a scalable icon and/or icons of different sizes. It should also resolve bug #3491.

The latest version of the Freedesktop specification can be found at:

<https://standards.freedesktop.org/desktop-entry-spec/desktop-entry-spec-latest.html>

A table of acceptable main categories can be found at:

<https://standards.freedesktop.org/menu-spec/menu-spec-1.0.html#category-registry>
