<b>Chirp Version:</b>	daily		
<b>Equipment Loan Offered:</b>	No		
<b>Subject:</b>	QYT KT-7900D ID and MCU		
<b>Description</b>			
<p>Hi all I've been going mad trying all solutions throughout this site and cannot for the life of me get CHIRP to read from my QYT KT-7900D.</p> <p>I have read through the btech.py and noticed after reading the version name from the packaged disc that the is for the radio I have is Model: QYT790 MCU-Version: VC4284</p> <p>Would this be why chirp is not reading and I am getting errors for radio ID?</p> <p>Can this ID be changed or is there a firmware to correct this?</p> <p>Thanks</p>			

### History

#### #1 - 11/07/2017 04:26 pm - Jim Unroe

- Status changed from New to Feedback

A patch was just submitted to add the VC4284 MCU version.

Jim

#### #2 - 03/03/2020 04:56 pm - Bernhard Hailer

- Target version set to chirp-daily

Does the patch work for you?

#### #3 - 03/03/2020 06:43 pm - Jim Unroe

- Status changed from Feedback to Resolved

- Assignee set to Jim Unroe

- % Done changed from 0 to 100

Support for additional MCU version added.
