

CHIRP - New Model # 5539

Status:	Closed	Priority:	Low
Author:	Steve Marsh	Category:	
Created:	01/30/2018	Assignee:	
Updated:	03/04/2020	Due date:	
Chirp Version:	daily		
Equipment Loan Offered:	No		
Subject:	Baofeng UV-5S		
Description	<p>I bought this UV-5S radio as it looked sturdier than the normal UV-5R. It appears to be a rebadged GT-3WP (136-174/400-520), tri power (5W max) and has the R-Tone option at menu position 41. It programs fine (or at least seems to) with the GT-3WP settings in Chirp.</p> <p>Power+3 tells me "Ver / NT5101" and Power+6 "170725N / WP970I"</p> <p>The Firmware settings after downloading into Chirp are both blank, which makes me think there may be slight differences between the UV-5S and a GT-3WP.</p> <p>I hope this helps. At least you can list it as a variant of the GT-3WP.</p>		

History

#1 - 03/04/2020 04:04 pm - Bernhard Hailer

- Status changed from New to Closed
- Target version set to chirp-daily
- Chirp Version changed from 0.4.0 to daily
