- Priority changed from Urgent to Normal

Hi Kenny.

I can confirm that the UV2 and UV3 models are not listed on the model drop-down box nor in the model support page
https://trac.chirp.danplanet.com/chirp_daily/LATEST/Model_Support.html

Looking at the diver's code I see a note from Dan that suggest that the KG-UVD1P is the same that the KG-UV2 and KG-UV3 at least in the things that

Chirp supports.

Please give it a try as the KG-UVD1P and get back to us with the results. If all works ok, bringing it to the drop-down box with it's correct name is trivial, but we need to know it works first.

Cheers, Pavel CO7WT.

#2 - 03/06/2020 11:06 am - Bernhard Hailer

- Status changed from Feedback to Closed
- Assignee deleted (Dan Smith)
- Target version set to chirp-daily
- Model affected changed from WOUXUN KG-UV3D to Wouxun KG-UV3D

Yes, the radio is supported - at least the list of [[Supported Radios]] suggests so.

As Pavel said, please use the Wouxun KG-UVD1P driver.
