

## CHIRP - Bug # 5837

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	Tysen Ficklin	<b>Category:</b>	
<b>Created:</b>	05/30/2018	<b>Assignee:</b>	
<b>Updated:</b>	05/09/2020	<b>Due date:</b>	
<b>Chirp Version:</b>	daily		
<b>Model affected:</b>	Baofeng UV-82HP		
<b>Platform:</b>	MacOS		
<b>Subject:</b>	Radio Did Not Respond Error.		
<b>Description</b>			
<p>This is my first time using CHIRP, and am new to these radios in general. I originally downloaded the application a few months ago but did not have a cable for my radio. At that time, I downloaded the most up to date version of CHIRP and the python runtime. I was able to open the application, but because I didn't have the right cable it did nothing for me.</p> <p>Today I received my cable (original FTDI cable from Baofeng) and have had no luck with cloning my radio. When I first opened CHIRP, I got a message box informing me of the new daily version. I then downloaded the newest daily version. Then I was getting the "Radio Did Not Respond" error. At one point I had it where I was getting a "radio refused to send block code 0x1ec0" error, but I have since done something where I don't even get that now.</p> <p>I am using a Baofeng UV82HP with the US2S35 firmware.</p> <p>Any help would be appreciated. Thank you.</p>

### History

#### #1 - 02/11/2020 01:52 pm - Bernhard Hailer

- Status changed from New to Feedback
- Priority changed from High to Normal
- Target version set to chirp-daily
- Model affected changed from Baofeng UV82HP to Baofeng UV-82HP

It looks like a cable issue. Please refer to these Wiki articles:

[[CableGuide]]

[[CableGuide FTDI OEM Cables]]

[[RTSystemsCablesAndMavericks]] (if you're running MacOS)

Let us know whether you got it to work.
