

CHIRP - Feature # 5943

Status:	New	Priority:	Normal
Author:	Rick DeWitt	Category:	
Created:	07/13/2018	Assignee:	Rick DeWitt
Updated:	07/13/2018	Due date:	07/20/2018
Chirp Version:	0.4.0		
Model affected:	(All models)		
Subject:	Driver-generated Comment field data		
Description			
<p>Please add the option for driver-generated Comment column data. This data is not to be saved to the img file, uploaded or downloaded. The data will be re-generated at each refresh, so any user edits would be discarded then. By adding a new flag to the radio features attributes that specifies this radio's Comment field is driver-generated, and then testing that attribute in run_tests.py we could avoid the compare_mem error there.</p> <p>The purpose of this mod is to provide a column for things like the memory-group channel number for the FT-450D.</p>
