

CHIRP - Bug # 6157

Status:	Closed	Priority:	Normal
Author:	Shawn Baker	Category:	
Created:	10/11/2018	Assignee:	
Updated:	03/25/2020	Due date:	
Chirp Version:	daily		
Model affected:	Yaesu FT-8900R		
Platform:	MacOS		
Subject:	Yaesu FT-8900R Settings Tab Missing & Bands Tab Issues		
Description	<p>Hello, I'm on a Mac v10.14, using the latest CHIRP daily, 20181009. When I downloaded an image of my FT-8900R, it's missing the Settings tab that I've grown accustomed to on CHIRP images for my FT-60R & FT-817ND. The tab is also missing if I download someone else's 8900R image and load it into CHIRP.</p> <p>Also, there is a Bands tab in CHIRP for 8900R images with 10 Bank columns, all rows blank -- this radio doesn't have bands in the traditional sense, it's got a pair of Home presets and 6 "Hyper Channels".</p> <p>Do both of these issues come down to the software implementation needing some work or is this a reality of cloning with the 8900R?</p> <p>In any case I'm still able to manage my presets without a problem, and can adjust any settings/"special" memories from the radio itself if I ever need to, so these issues are by no means a huge problem for me. Love CHIRP, thanks for all your work!</p>

Hi Shawn.

Chirp doesn't currently support FT-8900's settings, hyper memories etc. I just created a item #6357 to indicate, that I have started studying FT-8900's memory map and target is to get support for those. So far, I have managed to map basic structure for hyper memories etc, but some details are still under study.

Please keep in touch - my target is to get something out after 1-2 months.

That's great, thanks for everything!

#3 - 03/25/2020 10:16 pm - Bernhard Hailer

- Status changed from New to Closed
- Target version set to chirp-daily
- Chirp Version changed from 0.4.0 to daily
- Model affected changed from FT-8900R to Yaesu FT-8900R

Closing this one in favor of #3575. Please follow and post there. Thanks!
