Also request the -III model... I learned how much I miss chirp when I am forced to use the native software to program the radio.

If programmer is local to me, I might lend a radio for this.

OK I am in a spell where I do not need this radio for a little bit. If any of the helpers want it I can box and send. Hopefully close buy but whatever it takes

- Status changed from New to Feedback
- Target version set to chirp-daily
- Chirp Version changed from 0.4.0 to daily

Is the III different from the AT-5888UV implemented in Chirp?
