

CHIRP - Feature # 6357

Status:	Closed	Priority:	Normal
Author:	Kalle Tuulos	Category:	
Created:	01/07/2019	Assignee:	
Updated:	02/18/2021	Due date:	
Chirp Version:	daily		
Model affected:	Yaesu FT-8900		
Subject:	Yaesu FT-8900: hyper memories, home channels and settings to Chirp		
Description	<p>Current Chirp version doesn't have any support for Yaesu FT-8900's hyper memories, home channels and settings. I have started going through the memory map and so far, I have mapped the main structure for hyper memories, home channels and settings. There are some details, which I haven't understood yet, but hopefully those will be clarified.</p> <p>The mapping work will be interrupted for couple of weeks, as I need to send my radio for service (not related to this mapping). During this time, I'll start implementing the new tabs for settings, hyper memories and home channels.</p> <p>At some point, I'll send query to chirp-users post list, where I request FT-8900 users to send me their image maps and fill in the excel sheet, where I ask users to document device settings.</p> <p>As I can do mapping and implementation mainly on weekends, this will take still 1-2 months.</p>
