| **Subject:** | Settings Tab empty after setting PTT-ID (5-Tone) | | |

| **Description** |
|---|
| Hello,<br>I'm using latest CHIRP with a PUXING PX-888K<br>I noticed that if I set the BOT and EOT in the 5-Tone settings (see attachment), if I save the file and open it again, the Settings tab is totally empty, nothing appears.<br>Before saving closing the config I can upload to the Radio and the config seems fine (including PTT-ID configuration for BOT and EOT), the problem happens when opening again the IMG file.<br>Thanks for your consideration and best regards,<br>Pedro |

## History

Sorry, I'm actually using Mac... I don't know if that would happen on Windows too.

*- File PX-888K_SAMPLE.img added*

Steps to reproduce the issue:

1. Open the attached sample config

2. Configure BOT and EOT 5-code value (see attached image in original post)

3. Save the config and close it

4. Open the just saved config, the settings tab should appear empty

*- Status changed from New to Feedback*

*- Target version set to chirp-daily*

*- Chirp Version changed from 0.4.0 to daily*

*- Model affected changed from (All models) to Puxing PX-888K*

*- Platform changed from Windows to MacOS*

Have you been able to resolve this on your own since you submitted this?

Empty settings pages are a symptom of having one of them out of range.

Carefully go through all settings in your radio and see whether there's anything out of the ordinary.

Could you please provide a debug log as described in the Wiki: "[[How To Report Issues]]"? Thanks!
