<b>Updated:</b>	03/02/2019	<b>Due date:</b>	
<b>Chirp Version:</b>	daily		
<b>Equipment Loan Offered:</b>	No		
<b>Subject:</b>	FTM-7250		
<b>Description</b>	<p>Yaesu has a basic configuration for memory and settings plus dropped the price on this model making it more prominent in the market. It is a System Fusion model but the core is a basic dual band 50W rig. It ships with a Mini-USB cable for firmware updates but I am not sure if that can be used for memory and settings entry. Thank you for any assistance in adding this model to the program.</p>
