

CHIRP - Bug # 6585

Status:	Closed	Priority:	Normal
Author:	Adam Anderson	Category:	
Created:	03/09/2019	Assignee:	
Updated:	09/17/2020	Due date:	
Chirp Version:	daily		
Model affected:	BTech GMRS-V1		
Platform:	Windows		
Subject:	"Incorrect 'Model' selected." for Btech GMRS-v1		
Description	<p>When attempting to program my Btech GMRS-V1 with "CHIRP daily-20190120", I get the error: "Incorrect 'Model' selected." The firmware is the original release (2017) and hasn't been updated as I am unsure of how to carry that out, especially without the programming software communicating with the radio. I haven't located any help articles on here yet. My UV5R5 still communicates just fine with this daily version, as well.</p> <p>I have programmed them all in the past with an older version of CHIRP. Do I need to install an older version?</p>		

History

#1 - 03/16/2019 01:25 pm - Adam Anderson

I have also now tried the chirp-daily-20180906-installer.exe without success. "Incorrect 'Model' selected."
I heard back from customer support at Baofeng Tech and they said the firmware is not something that can be upgraded.

Any tips?

Has anyone encountered the same issue?

#3 - 05/12/2020 09:33 pm - Bernhard Hailer

- Status changed from New to Feedback
- Model affected changed from Btech GMRS v1 to BTech GMRS-V1

Could you please provide a debug log as described in the Wiki: "[[How To Report Issues]]"? Thanks!
