

CHIRP - Bug # 7681

Status:	Feedback	Priority:	Normal
Author:	Hazardous Medic	Category:	
Created:	03/06/2020	Assignee:	
Updated:	03/21/2020	Due date:	
Chirp Version:	daily		
Model affected:	Baofeng UV-5R		
Platform:	All		
Subject:	UV-5R Not accepting setting changes		
Description	<p>I just received a new UV-5R in the mail and when programming with CHIRP it will accept a new batch of channels correctly but changes in the settings tab aren't carried forward. I haven't tested all of the options, but specifically the welcome message won't change (what downloads also isn't what the radio displays) and I cannot modify the upper and lower VHF/UHF limits. It's currently says 'FCC' on startup and is limited to 144-148/430-450.</p>		

History

Forgot to mention in the original post:

Firmware 1: HN5RV01

Firmware 2: 1FB297

#2 - 03/06/2020 04:09 pm - Hazardous Medic

- File *Baofeng_UV-5R_20200306.img* added

- File *debug.log* added

Also, here is the log and img. The frequency range values were correct when downloading from the radio and uploading back, but the radio will not let me input anything outside of 144-148/430-450 no matter what the lower and upper limit settings are.

#3 - 03/07/2020 08:33 pm - Hazardous Medic

Update - I received a known-good img file from a fellow UV-5R owner and uploaded that to the device. I still can't manually tune outside of the restricted 144-148/430-450 ranges. However, he had frequencies programmed outside of that range (eg. 162.550) and in channel mode I can tune to them and receive transmissions successfully. So it seems like my manual frequency entry is locked out.

So it seems like my manual frequency entry is locked out.

Try going into the radio menu > STEP > for value switch to 2.5K.

#5 - 03/21/2020 07:49 pm - Bernhard Hailer

- Status changed from New to Feedback
- Target version set to chirp-daily
- Model affected changed from UV-5R to Baofeng UV-5R
- Platform changed from Windows to All

Please see previous post and tell us whether that worked.
