

CHIRP - Bug # 7809

Status:	Rejected	Priority:	Normal
Author:	Maxim Panin	Category:	
Created:	04/17/2020	Assignee:	
Updated:	01/01/2021	Due date:	
Chirp Version:	daily		
Model affected:	WLN KD-C1, Retevis RT22		
Platform:	All		
Subject:	Embedded Message on WLN KD-C1 (Variant of Retevis RT22)		
Description			
WLN KD-C1 (Variant of Retevis RT22)			
The message entry is not saved in the memory of the radio station. I save my phone number, and when reading I get the following characters:

- Status changed from New to Feedback

The newer Retevis RT22/RT622 models no longer support the embedded message. It would make sense that the WLN KD-C1 is the same. A recent update to CHIRP removes the embedded message selection when these models are detected.

Very sorry. In the program I select the radio station *WLN KD-C1*, in fact I have *Kenwood TK-F6 Smart*, I understand that this is some kind of copy, but I do not know which station. I don't think this is a new model. She has been on the market for a long time and in my opinion should still support messages.

You provided your own evidence that the radio doesn't support the embedded message. CHIRP provided the setting to allow you to change it. If embedded message in the radio didn't change, it was because the radio didn't support changing it, not something that CHIRP didn't do.
