[TH-UVF1] Add TYT TH-UVF1 Valid Tuning Steps

This patch adds rf.valid_tuning_steps

Fixes #8031

History

#1 - 07/02/2020 04:29 am - Jim Unroe

Would you please provide a list of the STEP values that are supported by this radio? Thanks.

Jim KC9HI

#2 - 10/05/2020 03:55 pm - Bernhard Hailer

- Status changed from New to Feedback

- Platform changed from Windows to All

I just found the manual which states (in the menu for number 31), that "5K/6.25K/.../100K" is supported. Unfortunately, the manual does not yield anything more than this - there's no table with all steps.

@Hemmelig Temmelig: you could help us by looking into menu 31: scroll between all available values and list them up here for us. Thanks!

#3 - 11/12/2020 04:24 pm - Greg Havener

I'm having the same issue with my UVF1, here are all of the options available from the menu:

5k,6.25k,7.5k,10k,12.5k,25k,37.5k,50k,100k

Hope this helps!

#4 - 11/12/2020 04:58 pm - Jim Unroe

- Assignee set to Jim Unroe

Greg,

Thanks. This is exactly what is needed. I have assigned this to myself and will try to work on it soon.

#5 - 11/13/2020 05:13 am - Jim Unroe

- Status changed from Feedback to Resolved

- % Done changed from 0 to 100

Patch submitted. Once accepted, support for the steps listed by Greg will be in the following CHIRP daily build.

Jim KC9HI

#6 - 11/13/2020 07:23 pm - Greg Havener

Thanks Jim!

Greg

#7 - 11/19/2020 01:14 pm - Anonymous

- Status changed from Resolved to Closed

Applied in changeset commit:45602d371bf6.

#8 - 11/20/2020 05:05 am - Jim Unroe

Fix available in the [latest CHIRP daily build](#).
