Unknown USB-Device , Failed to request device description</p> <p>Someone any Ideas ?</p>			

History

#1 - 07/28/2020 12:30 pm - Bernhard Hailer

- Tracker changed from Bug to New Model
- Subject changed from Kydera dr-360 to Kydera DR-360
- Target version set to chirp-daily
- Equipment Loan Offered set to No

The Kydera DR-360 (2 watt UHF handheld, DMR, 16 banks, 250 channels each) is currently not supported by Chirp. Sorry!

Hi together..

I got this radio (Kydera DR-360) but nowhere ist Programming-Software available.

I tried differet tips from FB, but nothing works.

Another Problem is, when i connect this Radio (with different Cables) per USB to my PC's, there is no working driver comes up.

Unknown USB-Device , Failed to request device description

Someone any Ideas ?

Hi everybody,

Ok, I know this is an old thread but, since I just bought it, I wonder if after 2 years this device is going to be supported by Chirp. I keep my fingers crossed.

To answer the questions asked by Ruediger:

1. The programming software is provided by Kydera (but I can share the file I received upon request).
2. The usb cable needed must have the Prolific USB-to-serial comm chipset and it's the same used to program the Baofeng UV5R.

Thank you

Mike Custodero
