[TI-F8+] Add support for TechSide TI-F8+

This patch adds support for the TechSide TI-F8+ (variant of Baofeng BF-F8HP)

related to #8187

History

#1 - 08/21/2020 03:48 am - Daniele Laterza

Hallo, ich bin hier, um auf ein neues Modell der Marke "TechSide" hinzuweisen, nämlich den TI-F8 +

Es kann derzeit mit der Einstellung Baofeng UV-5R programmiert werden

Es ist mit 3 Kräften "Hoch" "Mittel" "Niedrig" ausgestattet

Nur auf Englisch

https://www.amazon.it/dp/B07F3KPYCB/ref=twister_B087MDK6YP?_encoding=UTF8&psc=1

Hello, I'm here to point out a new model from the "TechSide" brand which is the TI-F8 +

It can currently be programmed with the Baofeng UV-5R setting

It is equipped with 3 powers "High" "Medium" "Low"

Only in English

https://www.amazon.it/dp/B07F3KPYCB/ref=twister_B087MDK6YP?_encoding=UTF8&psc=1

I await your news

Hi Danielle,

Then it is just another Baofeng BF-F8HP variant which should be programmed as...

Vendor: Baofeng
Model: BF-F8HP

If it can be programmed with the UV-5R model selection, then you must use the BF-F8HP selection to get support for 3 power levels.

Si può aggiungere come Marca TechSide con Relativo modello TI-F8+ ???

#8 - 08/21/2020 12:39 pm - Jim Unroe

But does the BF-F8HP selection work?

#9 - 08/21/2020 01:24 pm - Daniele Laterza

Jim Unroe wrote:

si ma ai clienti serve la marca TechSide con il modello giusto e la lingua è solo per Inglese e OFF
Diversamente è confuso
E' possibile fare la sezione TechSide dato che è un marchio registrato che ha questo modello?
Grazie

Yes. But I need to know that the BF-F8HP works so I can point it to and alter the appropriate code. The sooner that you cooperate, the sooner I can put it on my list of things to do.

So here is what I want. Download from a TI-F8+ using the BF-F8HP selection, save it as a CHIRP Radio Images (*.img) file and upload it to this issue so I have something to test with.

Jim

Ciao Daniele, forse hai capito male. Jim sta chiedendo se puoi collegare il tuo TechSide TI-F8+, ma in Chirp seleziona Baofeng BF-F8HP. Provalo, potrebbe funzionare.
Hello Daniele, maybe you misunderstood. Jim is asking whether you could connect your TechSide TI-F8+, but in Chirp select Baofeng BF-F8HP. Try it out, it might work.

Hello, this is the file received by the TI-F8 + radio by selecting BF-F8HP.
I inform you that in the TI-F8 + model it is not possible to insert the Chinese language, so I ask you to delete it from the selection menu.
Thank you

Hi Daniele,

Thank you for uploading the file.

Just to make sure I understand what you are asking, in addition to adding a selection of Vendor: TechSide / Model: TI-F8+, you also want the selection for "Voice:" on the Advanced Settings tab removed. Is that correct?

Jim

Ciao Daniele, la selezione Baofeng BF-F8HP in Chirp funziona con la tua TI-F8 ? Quali sono le rimanenti questioni aperte? Grazie!
Hi Daniele, does the Baofeng BF-F8HP selection in Chirp work with your TI-F8? What are the remaining open issues? Thanks!

Hi the radio works with BF-F8HP. However, I ask that the entry for the TECHSIDE brand be added. My clients can't find the model because it's the TI-F8 +.

The difference is that even after the reset the radio always has the pmr and lpd channels installed.

It is a new model.

Please add to list.

Thank you

Radio has been added as selection to Chirp, and to the list of [[Supported Radios]] here on the Wiki.

OK thanks. When will it be visible in the menu within the chirp software?

#18 - 10/07/2020 02:52 pm - Bernhard Hailer

I've just checked: it's not yet there (build 20200909). I assume it will be in the next build which should be out soon.

Thanks

#20 - 10/08/2020 04:47 am - Jim Unroe

It should have been in this morning's build. It seems that something must have tripped up the automatic build process. It will be in the next release whenever that happens.
