Any update on support for the Baofeng BF-H7 radios? I tried the software above but the program crashes when attempting to read from radio. I'm very new to all of this but happy to help if I can!

#3 - 03/30/2021 07:43 pm - Bernhard Hailer

- File deleted (*setup-BF-Hs.exe*)

- Status changed from *New* to *Feedback*

Sorry, the third party software files were removed - we don't want to run into copyright trouble.

No news on the BF-H7. The addition of a new radio to Chirp requires two things:

- 1) a volunteer developer who takes the task to work on this driver,
 - 2) availability of test equipment, such as a loaner radio (see [\[\[Rules For Loaning A Radio\]\]](#)).
- Unfortunately, you need to wait until both conditions have been met.
Or, you could decide to get your hands dirty yourself - check Wiki, "[\[\[Developers\]\]](#)".

Ok, I'll look into developer options. Unfortunately I'm not able to provide a radio at this time but could possibly arrange it in the future.

A temporary fix would be to use the Radioditty GA-510 setting. It works for Boafeng BF-H7 radio for frequency programming and basic radio settings.
