Hi Richard,

Which CHIRP daily build do you have installed. I installed the daily build from this morning (CHIRP daily-20201128) and the TYT TH-UV88 it is listed in mine (second from the top).

Thank you for adding the TYT TH-UV88 to CHIRP, however I wanted to download and I get a box "TYT TH-UV88 Instructions... This is an early beta stage" I tried to upload from CHIRP and unable to do so... So I am just wondering if this Radio TYT TH-UV88 is not be compatible with CHIRP

This is a common message that it put into a radio's driver module when it is newly coded. It usually there for a long time because removing it after a reasonable time is often overlooked.

I use this message as a reminder to save the first successful download, unedited, to a CHIRP Radio Images (*.img) file to be kept in a safe place as a

backup.

There it a box that you can tick so that future prompts with this message will be suppressed.
