

CHIRP - Feature # 8675

Status:	Resolved	Priority:	Normal
Author:	Rudolph Gutzerhagen	Category:	
Created:	01/14/2021	Assignee:	Rudolph Gutzerhagen
Updated:	04/15/2021	Due date:	01/15/2021
Chirp Version:	daily		
Model affected:	(All models)		
Subject:	Chirp control of start-directory and last-directory		
Description			
<p>further to Chirp Revision r916 (916:b04d28a7dd68), particularly in Windows, Chirp does not control which start-directory is used; instead the directory that the operating system behaviour uses is opened. In most cases this is reasonable. Some would consider this a bug.</p> <p>This should be tuned up for some feature additions which will rely on Chirp specifically controlling which directory to open. In a similar manner, the last-directory is also not fully controlled by Chirp.</p> <p>Applicable to default (py2) branch.</p>

- Status changed from New to Resolved

Hi Rudolph, is this still in the queue to be accepted?

#2 - 04/15/2021 01:53 am - Rudolph Gutzerhagen

Still open. Initial submission was rejected for code quality issues. Looking for a large block of time to test changes again.
