Subject:	KST K6900 clone of another radio?		
Description	<p>Hello,</p> <p>I am wondering if a KST K6900 is presently a clone of another radio so I can use it with CHIRP.</p> <p>KST is not listed as a supported brand at this time and the software used to program (vero-100) has issues of its own (or user error most likely).</p> <p>Please let me know if there is a workaround to use the radio with the CHIRP program.</p> <p>Any help is greatly appreciated!</p>		
Related issues:	duplicated by New Model # 9289: KST K6900 clone of another radio? Closed 08/16/2021		

History

- Tracker changed from Bug to New Model
- Target version set to chirp-daily
- Equipment Loan Offered set to No

I haven't found out much when I researched this (quickly) on the web. It's a 400-430/440-480 MHz, 16 channels, 7W, no display handheld. Nothing found about "Vero-100" software.
