When attempting to download from the radio, I receive the error message "Failed to Communicate with radio: Radio not responding"...however I do see lights flashing on the radio during this time.

I am able to use the KG-UV Commander software so I am reasonably certain that the differences must be minor. I've also attached the log file.

I am using the 20130626 daily build.

Thanks!

Also..I can provide a loaner radio if it would be helpful.

#2 - 02/12/2017 04:30 pm - Tim Smith

- Subject changed from Request support for Duet DT-UVD1P to Duet DT-UVD1P

#3 - 02/11/2020 05:05 pm - Bernhard Hailer

- Chirp Version changed from 0.3.0 to daily

- Equipment Loan Offered changed from No to Yes

#4 - 02/27/2020 06:57 pm - Bernhard Hailer

- Status changed from New to Feedback
- Target version set to chirp-daily

The Wouxun KG-UVD1P is supported by now - have you tried selecting it in Chirp?
