The TechSide website doesn't show this model. Can it be programmed using the TI-F8+ model selection?

Hello, here is the link on the manufacturer site.

I confirm that it can be programmed with the TI-F8 +

Please attach a CHIRP Radio Images (*.img) file from this radio. Thanks.

Thank you.

I have additional questions about the Voice menu. When I was asked to add the TI-F8+ to CHIRP, I was asked to remove the Voice setting. Apparently the radio is set to English voice prompts with not means for shutting them off? I need to know if this is also the case with the TS-T9+? Check to see if the radio has menu 14 (VOICE) and if it does, what are the valid choices and do all of the choices work?

Hi, in menu 14 you can only choose "English" or "off"

I'll bet the TI-F8+ is the same way. Can I trouble you to attach 2 radio image files? One with voice set to "English" and the other set to "Off".

Thanks,

I think I've got it figured out. I don't think that I need the requested images any longer.
