<b>Updated:</b>	11/20/2021	<b>Due date:</b>	
<b>Chirp Version:</b>	daily		
<b>Model affected:</b>	(All models)		
<b>Subject:</b>	Anytone driver: Additional Option Settings		
<b>Description</b>			
<p>I have a PowerWerx DB-750X (Anytone driver). With it, I've researched several more settings than what anyone.py current supports.</p> <p>So far, I have found:</p> <ul style="list-style-type: none"><li>- VFO scan range limits (5 pairs)</li><li>- Backlight brightness (RGB)</li><li>- The flag that locks the user out of manually reprogramming from the keypad.</li><li>- Programmable Keys A, B, C, D</li></ul>
