[th-uv88] Add settings to TYT TH-UV88

This patch adds the remaining settings from the OEM "Basic" settings page.

- Radio Moni
- End_Tone_elim
- SW Audio
- Scan Type
- Key Lock
- Key Mode
- Intro Screen

Also firmware BQ1.41+ allows the radio to independently select MR/VFO mode on the A and B display lines. This patch also adds support for this new feature.

#9581
