Updated:	05/12/2022	Due date:	
Chirp Version:	daily		
Equipment Loan Offered:	No		
Subject:	Wanneton Mini		
Description			
<p>Hello,</p> <p>I have a model of the radio from 2019 from the Chinese company QUANZHOU WANNETON. I have the original software available for Windows, I can work with it, but it doesn't work well - it has errors.</p> <p>The software is named WLT_M2 (WLT-M2) and the installation file is 2460kB. The walkie-talkie is called MINI and the product page is here:</p> <p>http://www.wanneton.com/en/show/177</p> <p>The walkie-talkie is very good for everyday use and is pleasantly small. I do not see the radio in the list of supported radios. I discovered your Chirp software today and I really like it. Could Wanneton WLT-M2 support be added?</p> <p>I wish you a nice day!</p> <p>Pavel</p>
