Chirp Version:	daily		
Equipment Loan Offered:	No		
Subject:	CRT Electro UV aka Retevis RA25(?) aka AnyTone AT779UV(?) aka Radioddity DB20G(?)		
Description	<p>The CRT Electro UV is a nice and cheap VHF/UHF-FM Tranceiver, but the software is crap. You don't believe how bad this little peace of software is. I tried also the special software from AnyTone, Retevis and Radioddity - same crap. I tried with CHIRP several other models, but no good result.</p> <p>CRT Electro UV: https://www.crtfrance.com/en/mobiles-transceivers/975-crt-electro-uv.html</p> <p>Retevis RA25: https://www.retevis.com/ra25-dual-band-mobile-ham-radio</p> <p>AnyTone AT779UV: http://anytone.net/pro_info100.html</p> <p>Radioddity DB20G: https://www.radioddity.com/products/radioddity-db20g</p>

Dupe of #9902 (RA25)

Dupe of #8953 (AT-779UV)

Dupe of #9241 (DB20G)

Please participate, contribute and watch these existing issues.

From the [How To Report Issues](#) page.

Please DO NOT attach the manufacturer's software to the issue. Even if you think the software is freely available via download elsewhere, that does not mean you can legally distribute it yourself. Posting it here also opens up the CHIRP website and community to potential action by owners of that software. If it is downloadable somewhere, feel free to post a link but DO NOT attach it to the issue.
